

Warm, Warmer, WARMCUBE™

The story of Marmot's award winning WarmCube™ technology started back in 2019 – and it became a success story. Every year since, the evolution of WarmCube™ products has won industry leading awards and WarmCube™ now features in a variety of clothing and sleeping bags.

WarmCube

The innovative 3D construction of our WarmCube™ technology keeps you warm, wherever your next adventure takes you. Air channels between the cubes fill with warm air and built an additional insulation. WarmCube™ cubes are filled with 800 fill-power down or synthetic featherless insulation, providing a WarmCube™ option for every climate.
